

Sai Sandeep Kommi

DATA ENGINEER | DATABRICKS | SQL | PYSPARK

Arlington, TX | skommi18@gmail.com | linkedin.com/in/sai-sandeep09 | github.com/Ksaisandeepkumar

PROFESSIONAL SUMMARY

Data Engineer with 2+ years of combined professional and internship experience across healthcare, banking, and payments. Develops and supports ETL/ELT pipelines using Azure Databricks, SQL, Python, PySpark, Delta Lake, Snowflake, and Airflow. Experience with incremental ingestion, data modeling, reconciliation, data quality, and production monitoring. Hands-on Medallion Architecture in a PySpark streaming project.

TECHNICAL SKILLS

Processing: SQL, CTEs, window functions, joins, query tuning, Spark SQL, Python, PySpark, pandas, ETL/ELT, CDC, incremental loads, deduplication

Platforms: Azure Databricks, Delta Lake, Azure Data Factory, ADLS Gen2, Snowflake, Airflow, dbt

Reliability: Dimensional and normalized modeling, reconciliation, schema validation, data quality, testing, monitoring, debugging, root-cause analysis, performance optimization

Delivery and analytics: Agile, Git, GitHub, code review, CI/CD, stakeholder communication, Power BI, Tableau, Grafana

PROFESSIONAL EXPERIENCE

Data Engineer (Contract) | Elevance Health

February 2026 - August 2026 | Dallas-Fort Worth, TX

- Built Databricks, PySpark, and Delta Lake ETL/ELT pipelines processing 3+ TB of claims, member, and provider data daily.
- Developed CDC and incremental ingestion frameworks, reducing processing latency by 40%.
- Optimized Snowflake models serving 250+ business users, improving query performance by 35%.
- Implemented dbt and Airflow validation and monitoring workflows, reducing production data issues by 45%.

Engineer Intern | Elevance Health

August 2025 - January 2026 | Dallas-Fort Worth, TX

- Completed a six-month internship supporting healthcare workloads and progressed to a contract Data Engineer role.

ETL Developer | LTIMindtree

June 2023 - November 2023 | Hyderabad, India

- Developed PySpark and Databricks ETL/ELT pipelines for banking risk and compliance reporting.
- Built reusable notebooks and ADF pipelines loading data into ADLS Gen2 and Delta Lake.
- Implemented CDC, incremental loads, dimensional models, reconciliation, deduplication, and late-data logic.

Data Analyst Intern | Mphasis

January 2023 - June 2023 | Chennai, India

- Developed ETL pipelines processing 2M+ payment, merchant, and settlement transactions daily.
- Built Python and SQL transformations that improved processing efficiency by 25%.
- Automated validation, reconciliation, and deduplication to improve accuracy and reduce manual effort.

SELECTED PROJECT

PySpark Streaming Deduplication and Late Data Pipeline

Southern Arkansas University | June 2024 - October 2024

- Built a Structured Streaming pipeline with transaction-event deduplication, event-time watermarking, and curated Bronze, Silver, and Gold outputs.

EDUCATION

MS, Computer and Information Sciences | Southern Arkansas University

December 2025 | GPA 3.8/4.0

BS, Computer Science | Bharath Institute of Higher Education and Research

May 2023 | GPA 8.88/10

CERTIFICATIONS

Spark, Hadoop, and Snowflake for Data Engineering - Duke University

Introduction to Data Engineering - IBM | EF SET English C1 Advanced
